Ibrahima Barry

Ibrahima Barry is a recent graduate of the University of Essex, from where he earned his degree in Electronic Engineering. He is a fast learner and appreciates the importance of flexibility and adaptability towards achieving his goals. As an example, during the period of writing his thesis, Ibrahima learned how to operate a humanoid robot using specialized software within a couple of weeks. He also participated in team exercises requiring the programming of robots to do certain tasks. Consequently, Ibrahima sees himself as a team player with robust organizational skills and capability to organize tasks effectively.
